PROJECTS

Personal Finance Tracker Link	06/2025
--	---------

- Developed a full-stack Personal Finance Tracker, architecting a RESTful API with Node.js and Express.js to enable users to effectively track, categorize, and manage financial data.
- Provided insightful financial overviews with interactive data visualizations and real-time dashboards, ensuring a responsive and seamless experience across all devices.
- Implemented secure user authentication and robust data persistence for sensitive financial records.
- **Technologies used:** React.js, Node.js, Express.js, MongoDB, Shadcn UI.

CloudNotes Link	04/2025
--	---------

- Utilized the MERN stack to build a complete note-taking application.
- Implemented secure user authentication using JWT and Express.js to protect user data and ensure personalized access to notes. Developed and integrated a robust note management system featuring full CRUD operations, enhancing user productivity and organization.
- **Technologies used:** React.js, Node.js, Express.js, MongoDB, Shadcn UI.

Employee Management System Link	11/2024
--	---------

- Developed a React-based employee management system with a task management module, including task assignment, acceptance, status tracking, and an admin dashboard.
- Designed a user-friendly interface for efficient employee and task management, utilizing local storage for data persistence.
- **Technologies used:** React.js, Shadcn UI, JavaScript.
